Give to important people as gifts that will be remembered forever.

We accept orders for custom engraving. Products can be engraved with up to six alphabetic letters. Select from three lettering styles. \* Separate engraving fee

# Living with nature

All RIVERET products are made from natural Moso bamboo. Moso bamboo is a natural resource that can be continuously renewed on a minimum amount of land, making it an effective method of resource utilization to help control deforestation, a major cause of environmental problems. "Living with nature" is a message for the next age conveyed through the skill of our craftsmen.

LOHAS COAT is a coating technology developed in-house that suppresses e-coli and staphylococcus aureus thanks to a synergistic effect of the paint that contains natural green tea ingredients and phytoncide already a component of the bamboo itself. All RIVERET tableware utilizes this new LOHAS COAT technology, allowing us to manufacture safer and more reliable natural dishware.

We have applied an original coating we developed that permeates inside the bamboo so that our products can be used in a normal manner just like ceramic and glass dishware. (Coating Conforms to Food Sanitation Act) The coating prevents colors from changing and staining due to use with foods like wine and coffee.

All RIVERET dishware can be used with household dishwashers. Our dishware passes the dishwasher drying resistance test, which is rare for dishware made from natural materials. Of course, washing with dish washing liquid is also possible just like with any ceramic or glass dishware. ※ Limited to use at a hot water temperature setting not higher than 70°C.
